ZATIARAS JUICE

Decision Register

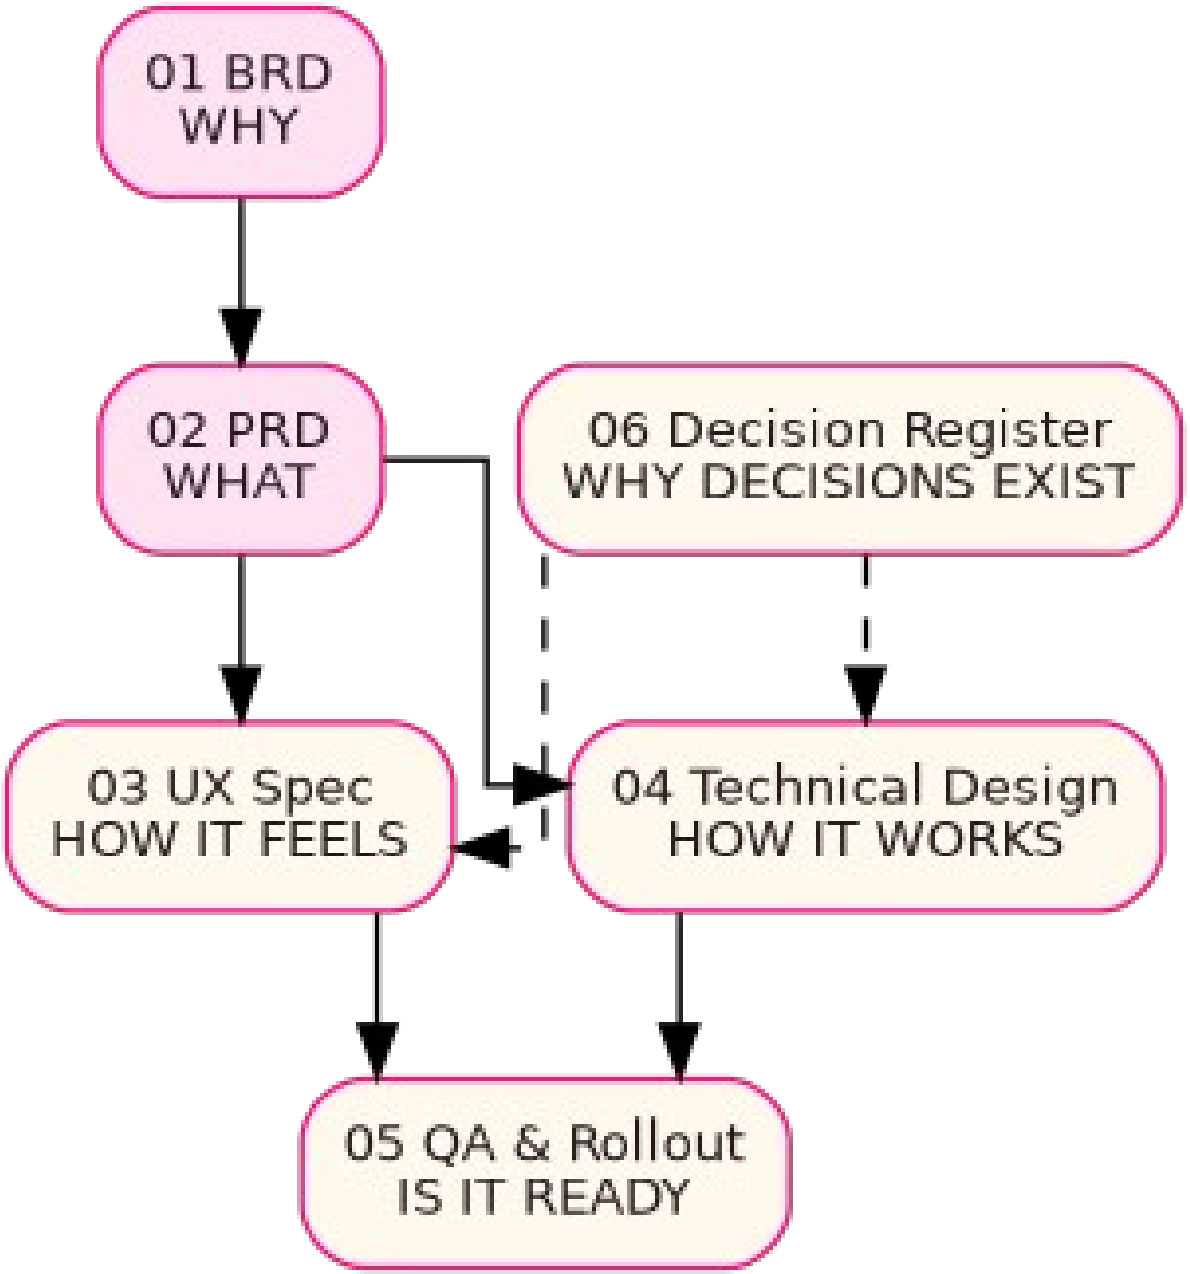

Zatiaras Web V1 - Approved decisions, rationale, risks and revisit triggers

Document code	ZJW-DEC-006
Version	1.1
Status	Reconciled Baseline
Planning cut-off	15 September 2026
Agent companion	AGENTS.md + README.md decision map
Normative basis	Reconciled domain-specific source hierarchy; 3 official brand PDFs govern visual identity; legacy digital BRD excluded

Purpose

This document is part of the reconciled Zatiaras Web V1 source-of-truth set for human review and controlled handoff to AI coding agents. It is synchronized with a repo-native companion file and the official brand PDF authority set. The legacy digital BRD is not normative.

Document set, source authority and companion mapping

Human specification	Repo-native companion	Primary authority
01 BRD	docs/PRODUCT.md	Business intent, outcomes, scope
02 PRD	docs/SPEC_V1.md	Product behavior and business rules
03 UX Specification	docs/UX.md	Interaction and user journeys
04 Technical Design	docs/ARCHITECTURE.md + docs/CONTRACTS.md	Architecture, boundaries and contracts
05 QA / Rollout	docs/QUALITY.md	Definition of correct and launch gates
06 Decision Register	AGENTS.md + referenced decision IDs	Decision rationale and revisit triggers
3 official Brand PDFs	docs/BRAND_REFERENCES.md	Visual identity and application authority

Current document mapping
06 Decision Register is paired with AGENTS.md + README.md decision map. If prose conflicts with the official brand PDFs on visual identity, the brand PDFs win for that domain. If implementation conflicts with approved requirements, the conflict must be surfaced rather than guessed.

1. Purpose and governance

This register records the major product, business, UX and architecture decisions that shape Zatiaras Web V1. It exists to prevent repeated re-litigation, preserve rationale for humans and coding agents, and make explicit when a decision should be revisited.

Status model
LOCKED = implement as decided unless material evidence changes. WORKING = current direction, may be refined. OPEN = implementation decision still requires evidence/audit. DEFERRED = deliberately not V1.

2. Approved decisions

ID	Decision	Status	Decision statement	Rationale	Revisit trigger
DEC-001	Website role	LOCKED	Owned digital storefront + self-order pickup + discovery/data layer; not a brochure.	Direct channel, repeat, data, trust	Review only if business model changes materially.
DEC-002	Pilot geography	LOCKED	Samarinda first: Juanda + Slamet Riyadi.	Controlled learning before expansion	Review after pilot evidence.
DEC-003	Channel strategy	LOCKED	Web complements, not replaces, WhatsApp, marketplaces and walk-in.	Omnichannel practicality	Review if external channels materially change economics.
DEC-004	Guest checkout	LOCKED	No mandatory account for V1 ordering.	Reduce friction	Review only if regulated/loyalty need emerges.
DEC-005	Pickup-first commerce	LOCKED	Owned delivery engine not V1.	Lower operational complexity	Review after pickup channel stabilizes.
DEC-006	Paid-order production rule	LOCKED	No verified payment = no production for normal web orders.	Ghost order/spoilage control	Review only if approved pay-at-outlet product exists.
DEC-007	Paid exception recovery	LOCKED	Human WhatsApp handoff for money/fulfillment uncertainty.	Trust and reassurance	Automate only after proven safe.
DEC-008	Availability model	LOCKED	Available/Limited/ Sold Out + Busy Mode; no exact omnichannel inventory V1.	Marketplace demand not synchronized	Review when reliable omnichannel stock exists.
DEC-009	Group order	WORKING	Explicit multi-cup lane; large threshold requires approval before payment.	Historical POS shows material multi-cup demand	Threshold to be validated.
DEC-010	Homepage experience	LOCKED	Controlled immersive product-led commerce; one	Brand memory without conversion	Reduce if performance/usability

ID	Decision	Status	Decision statement	Rationale	Revisit trigger
			signature scroll experience.	loss	suffers.
DEC-011	Full 3D/WebGL	DEFERRED	Not a V1 requirement. Prefer real product + 2.5D depth.	Product truth and mobile performance	Revisit only with clear business use case.
DEC-012	Brand system	LOCKED	Three official PDFs govern visual identity: Asset Master Pack (exact assets/production), Brand Identity Guidelines (identity rules), Application & Rollout Kit (applications). No AI-redrawn logo.	Brand consistency and source control	Only a formally approved new brand release can supersede.
DEC-013	Staff UX	LOCKED	Extremely simple, few decisions, plain Indonesian, large actions.	Crew digital literacy constraint	Review via staff UAT.
DEC-014	SEO / AI discovery	LOCKED	Built from day one: SSR, structured local/product facts, crawler policy.	Discovery and entity visibility	Review with Search Console/AI referral evidence.
DEC-015	AI chatbot	DEFERRED	No customer chatbot in V1.	Adds complexity without clear value	Revisit after data/use cases exist.
DEC-016	Frontend	WORKING	SvelteKit + TypeScript.	SSR + mobile commerce + motion fit	Revisit only with compelling technical evidence.
DEC-017	Runtime	WORKING	Cloudflare Workers.	Existing ecosystem + full-stack support	Revisit if platform constraint appears.
DEC-018	Database	OPEN	Do not lock until ZatiarasPOS data layer audit.	Avoid dual source of truth	Resolve before backend implementation.
DEC-019	Payment provider	OPEN	Use adapter architecture; select provider based on current commercial/technical verification.	Pricing/refund/ webhook terms change	Resolve before production payment integration.
DEC-020	Legacy BRD	LOCKED	Not normative for this new project.	Current planning supersedes old digital assumptions	Consult only when explicitly requested.
DEC-021	Documentation model	LOCKED	Human PDF specifications + repo-native agent instructions/contracts /tests, connected by explicit companion mapping and domain-specific source authority.	Supports governance and agentic coding	Keep synchronized through change control.

3. Open decisions requiring evidence

Open item	Evidence required	Owner of resolution / timing
Database / persistence	ZatiarasPOS repo/data-layer audit;	Resolve before core backend build

Open item	Evidence required	Owner of resolution / timing
	schema, auth, deployment, migration cost	
Payment gateway	Current QRIS/processing pricing, refund API, settlement, signed webhook, payout and onboarding	Resolve before production checkout
Group-order threshold	Outlet prep capacity + historical basket behavior + pilot load	Resolve during UX/operations design
Pickup-slot capacity	Actual prep time distribution and busy-hour observation	Start configurable, tune during soft launch
Current menu/price truth	Latest approved Samarinda menu, variants and prices	Verify before content freeze
Owner-safe financial targets	Current OPEX, supplier, shrinkage and marketplace payout reconciliation	Separate finance analysis after current data is available

4. Decision principles for future changes

1. Profit/contribution and operational feasibility outrank feature novelty.
2. Customer trust outranks automation when money is uncertain.
3. Product truth outranks decorative visual effects.
4. Public discovery content must remain understandable by humans and machines.
5. Staff tools must be simpler than customer-facing presentation.
6. If a feature cannot be measured or safely operated, pilot it before scaling.
7. If a coding agent discovers conflict between implementation and approved requirements, it must surface the conflict rather than invent policy.

5. Implementation sequence derived from decisions

Sequence	Outcome
1	Freeze current menu/outlet truth + audit ZatiarasPOS data layer
2	Finalize product/UX screen specification and exact brand assets
3	Create repo-native agent pack and executable contracts
4	Build public discovery + menu/product/branch pages
5	Build cart/guest checkout/payment/order lifecycle
6	Integrate outlet order queue + availability/busy mode
7	Build tracking + WhatsApp human recovery + feedback
8	Instrument analytics + SEO/AI discovery controls
9	Run QA/UAT/usability + soft launch
10	Scale traffic only after business/operational evidence supports it

Sources and evidence basis

Source authority is domain-specific. Business/product intent is governed by the reconciled BRD, PRD and Decision Register; UX by the UX Specification; technical implementation by Technical Design plus executable contracts/tests; visual identity by the three official brand PDFs (Asset Master Pack, Brand Identity Guidelines, Application & Rollout Kit). Internal operating data supports evidence, external official guidance supports implementation/research, and the legacy digital BRD is not normative.

Internal sources

[INT-0] Zatiaras Web V1 reconciled source-of-truth model. Business intent is governed by the current BRD/PRD/Decision Register; UX by the UX Specification; technical implementation by Technical Design plus executable contracts/tests; brand/visual identity by the three official brand PDFs listed below. Project conversation is provenance and working context, not authority over approved brand assets. The legacy digital BRD is intentionally excluded as a normative source.

[INT-1] Project planning conversation and research through 15 September 2026. Used as provenance for decisions captured in this reconciled specification set; not a substitute for approved source documents.

[INT-2A] Zatiaras Brand Asset Master Pack V1.0, 12 pages. Highest brand authority for exact assets, logo hierarchy/protection, approved variants, graphic-device assets, production rules, cup branding, vendor handoff and brand QA.

[INT-2B] Zatiaras Juice Brand Identity Guidelines V1.2 Reconciled, 12 pages. Brand authority for essence, messaging hierarchy, color system, typography, slogan system, graphic language, product imagery and digital identity behavior.

[INT-2C] Zatiaras Juice Application & Rollout Kit V1.0, 12 pages. Brand authority for touchpoint/application patterns including social, marketplaces, GBP, menu/price communication, signage, packaging, campaign templates and branch rollout.

[INT-3] POS_TRANSAKSI_SAMARINDA_2025-11-26_sd_2026-06-26.xlsx. Historical baseline only; not current September 2026 performance and does not reliably separate Juanda vs Slamet Riyadi.

[INT-4] MASTER_HPP_SEMUA_MENU_ZATIARAS_2026-06-30.xlsx and MASTER_SOP_PORSI_ZATIARAS_SEMUA_CABANG_2026-06-29.xlsx. Cost/portion context; current supplier, shrinkage and OPEX still require operational reconciliation.

[INT-5] MASTER_HARGA_MENU_ZATIARAS_3_KOTA_AS_OF_2026-06-29.xlsx. Historical price master; verify current prices before production publication.
